Profile

Dedicated and responsible individual with a passion for programming and design. Excels at identifying and troubleshooting critical issues, retaining information and relating/communicating information with others. I also have exposure to more languages and software than are listed and I will gladly learn more.

Employment History

Cooperative Education Intern, CodeMettle LLC, Sandy Springs, GA

JANUARY 2020 – MAY 2020

- Worked with Windows, rhel7, Java, Python, Jython and Apache Solr
- Operated in teams using Scrum methodology, mostly managed thru agile software such as Jira or Trello
- Well practiced with github, command prompt and linux shell
- Greatly improved my knowledge of computer networks, computer hardware and troubleshooting both
- Dealt with system configuration and updated the base image for one of my projects
- Setup their core software development environment and implemented two bug fixes
- Racked servers and solved hardware issues

Intern, Paul E. Hagler, P.E., P.L.S Engineering Consultant, Clearwater, FL

JUNE 2014 – JUNE 2014

- Worked as an intern under a certified civil engineer
- Organized files and improved clerical skills
- Demonstrated a basic understanding of Computer Aided Drafting (CAD)
- Remodel a bathroom to comply with the Americans with Disabilities Act (ADA)
- Created a topographic map and tree survey using CAD

Intern, Pinellas County Government Information Technology Department, Clearwater, FL

JUNE 2015 – JULY 2015

- Imaged multiple computers
- Demonstrated a basic understanding of Microsoft excel
- Efficient at data input and clerical work
- Gained field experience with customers in their work space

Education

Bachelor's of Computer Science, Georgia State University, Atlanta

SEPTEMBER 2015 – DECEMBER 2020

Currently enrolled and set to graduate in December of 2020. Computer Software Systems concentration with an emphasis on full stack development and database management.
